

Exhibit F:
Exemplary Infringement of U.S.
Patent No. 10,188,940 by PS4
Controller with “Smart Trigger”

| Claim 1 of US 10,188,940 | |
|---|---|
| <p>An apparatus for supplying user inputs to a computer program for controlling the computer program,</p> | <p>To the extent the preamble is limiting, the Battle Beaver products include this feature. The PS4 Pro Builder is an apparatus that supplies user inputs to a computer program for controlling the computer program.</p>  <p>For example, the Smart Triggers provide an “input” for computer programs, such as “shooter games” including “Halo.” https://battlebeavercustoms.com/tools/help-center#what-are-smart-triggers-bumpers</p> <div data-bbox="656 992 1875 1269" style="background-color: black; color: white; padding: 10px;"><p>▼ What are Smart Triggers / Bumpers?</p><p>Our Smart Triggers and Smart Bumpers are what we believe to be the epitome of performance modifications for shooter games, the remove the travel time necessary for the button to register an input. Instead of having to travel all the way down, all you'll hear is that satisfying 'click' the instant you decide to pull the trigger.</p><p>For you Halo fans, our Smart Triggers register instantly at 100% so there's no need to worry about charging for that Noob Combo!</p></div> |

4871-8024-6806\1

| | |
|---|--|
| the apparatus comprising an outer case, | <p>The PS4 controller includes an outer case.</p>  |
| at least one depressible trigger mechanism, |  |

4871-8024-6806\1

and a mechanism for manual adjustment of a range of motion of the at least one trigger mechanism, the mechanism being disposed within an internal volume defined by the outer case of the apparatus.

The Smart Triggers include a mechanism that manually adjusts a range of motion of the at least one trigger mechanism. The Smart Trigger is disposed within an internal volume defined by the outer case of the apparatus.

The Smart Trigger modifies the as-manufactured travel path of the trigger to “remove” travel time to actuate the button, i.e., shortens or adjusts the range of motion of the trigger. The Smart Trigger is positioned within the outer case of the apparatus.

▼ **What are Smart Triggers / Bumpers?**

Our **Smart Triggers and Smart Bumpers** are what we believe to be the epitome of performance modifications for shooter games, the remove the travel time necessary for the button to register an input. Instead of having to travel all the way down, all you'll hear is that satisfying 'click' the instant you decide to pull the trigger.

For you Halo fans, our Smart Triggers register instantly at 100% so there's no need to worry about charging for that Noob Combo!

| 17. The apparatus of claim 6 wherein a position of the stop defines a range of motion of the at least one deppressible trigger mechanism. | <p>The position of the stop defines a range of motion for the trigger, where for the Smart Trigger, the stop is positioned closer to an engagement wall of the trigger and for Racer Trigger, the stop is further away, defining a longer range of motion.</p> |

4871-8024-6806\1

Depressible trigger

Position of stop defines range of motion for trigger

Options for trigger modifications include "Smart Trigger" and "Racer Trigger," where the Racer Trigger allows 50% of the original trigger movement.

<https://battlebeavercustoms.com/tools/builder/63>

Triggers

Left Trigger

No Trigger Adjustments Racer Triggers Smart Triggers

Smart Triggers: Permanently and internally converts linear trigger into a button. Removes the progressive ramp up, and has the shortest and lightest trigger pull available. Works for most games.

Right Trigger

No Trigger Adjustments Racer Triggers Smart Triggers

Racer Triggers: A unique trigger that is a hybrid between Stock and Smart triggers. The trigger will move freely from 0-50% then click a smart trigger switch to instantly go from 50-100%
